A horizontal timeline of the 20th century, spanning from 1880 to 2020. The timeline is marked with years in 20-year increments: 1880, 1890, 1910, 1930, 1950, 1970, 1990, 2010, and 2020. Above the timeline, there are several vertical bars of different colors (yellow, orange, red, green, blue) representing various periods or events. The yellow bars are located between 1880 and 1890, 1890 and 1910, 1910 and 1930, 1930 and 1950, and 1950 and 1970. The orange bars are located between 1890 and 1910, 1910 and 1930, 1930 and 1950, and 1950 and 1970. The red bars are located between 1910 and 1930, 1930 and 1950, and 1950 and 1970. The green bars are located between 1930 and 1950, and 1950 and 1970. The blue bars are located between 1950 and 1970, and 1970 and 1990. The timeline ends at 2020.

02395120 TWO RUN CREEK NEAR KINGSTON, GA

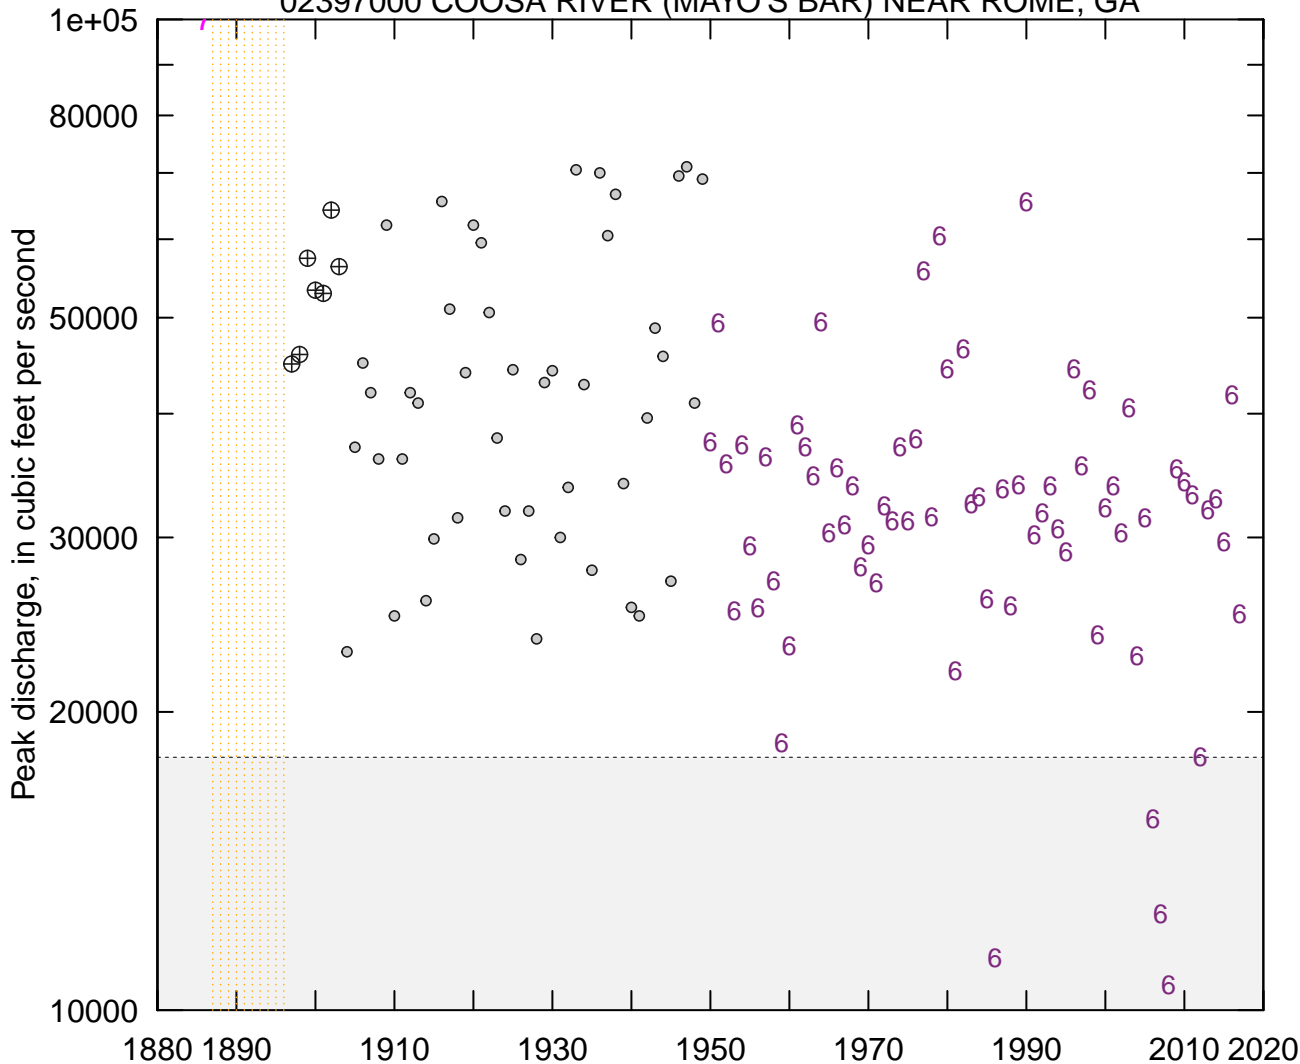

# 02395980 ETOWAH RIVER AT GA 1 LOOP, NEAR ROME, GA

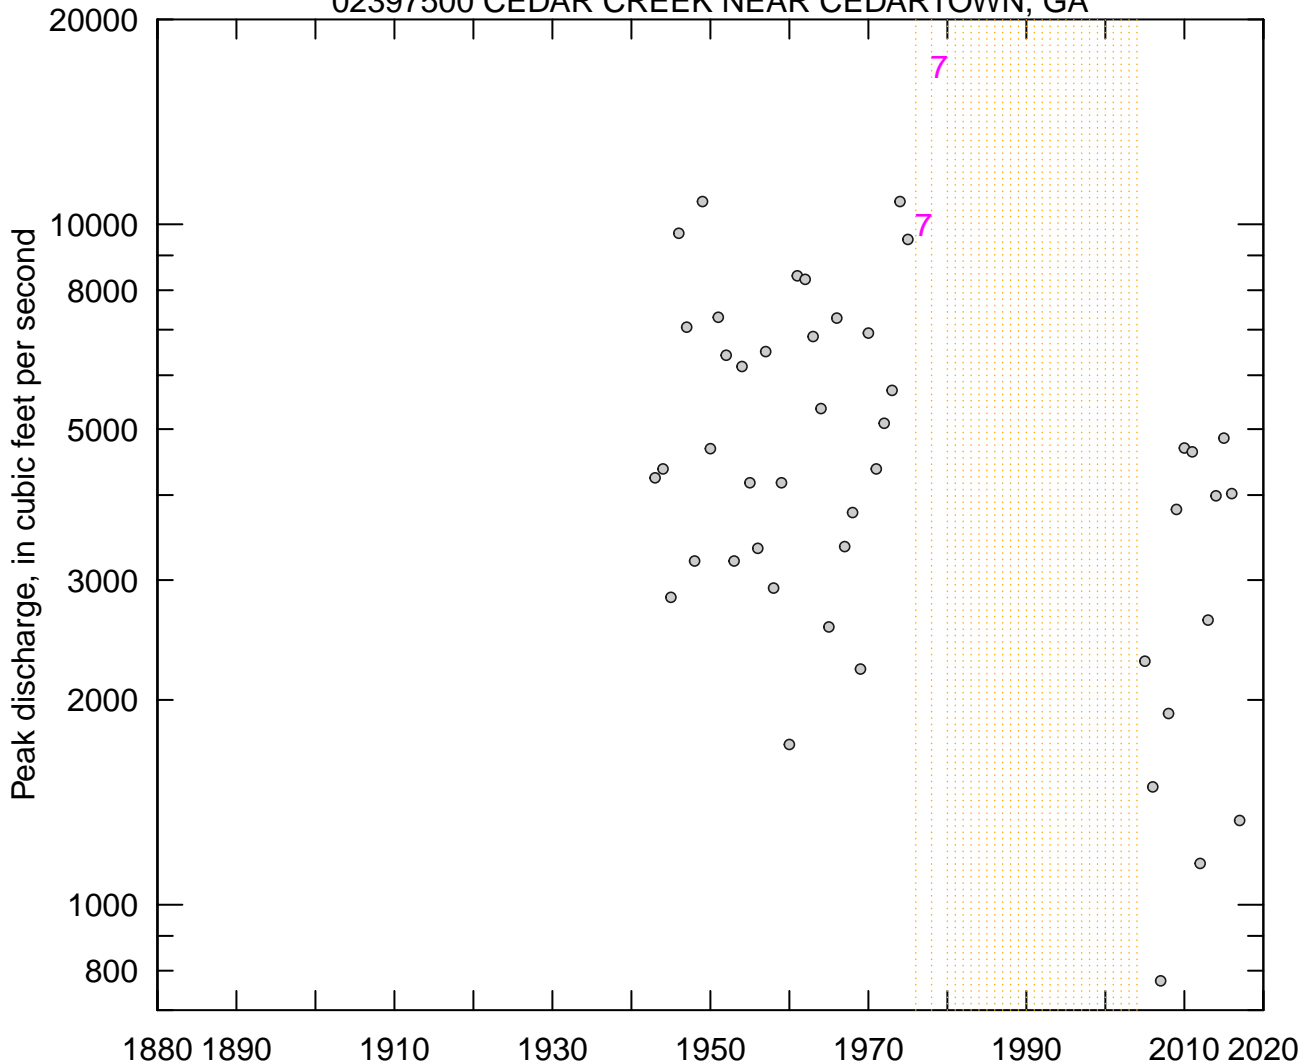

A scatter plot illustrating two distinct clusters of data points. The left cluster is composed of approximately 35 open circles, while the right cluster is composed of approximately 35 purple numbers '6'. The clusters are well-separated, with the circles generally occupying the left half of the plot and the '6's occupying the right half. The plot includes a coordinate system with tick marks on all four sides, but no numerical values are provided for the axes.

A scatter plot showing 1000 data points. The points are represented by small black circles. A subset of these points is labeled with a purple '6'. The labels are distributed across the plot, with a higher density in the central region. The plot is enclosed in a square frame with tick marks on all four sides.

A scatter plot showing 1000 data points. The points are labeled '5' (black) and '6' (purple). A horizontal dashed line is drawn at  $y = 0.5$ . The region below this line is shaded light gray. The plot shows a clear separation between the two classes, with most points of class 5 located above the dashed line and most points of class 6 located below it. There are some outliers, particularly for class 6, which are located above the dashed line.

The scatter plot displays the relationship between  $\log_{10}(\Delta T)$  (y-axis) and  $\log_{10}(\Delta T_{\max})$  (x-axis) for 1000 stars. The x-axis ranges from 1.5 to 3.5, and the y-axis ranges from 0.5 to 1.5. A vertical dashed line is drawn at  $\log_{10}(\Delta T_{\max}) \approx 2.8$ . The bottom of the plot is shaded gray. The data points are categorized by color: black, purple, and orange. The black points are concentrated in the upper left region, while the purple and orange points are more spread out, with orange points appearing at higher  $\log_{10}(\Delta T_{\max})$  values.
